

# Selecting the Right Tablet PC for Business

## Point-of-Service Productivity vs. Content Consumption

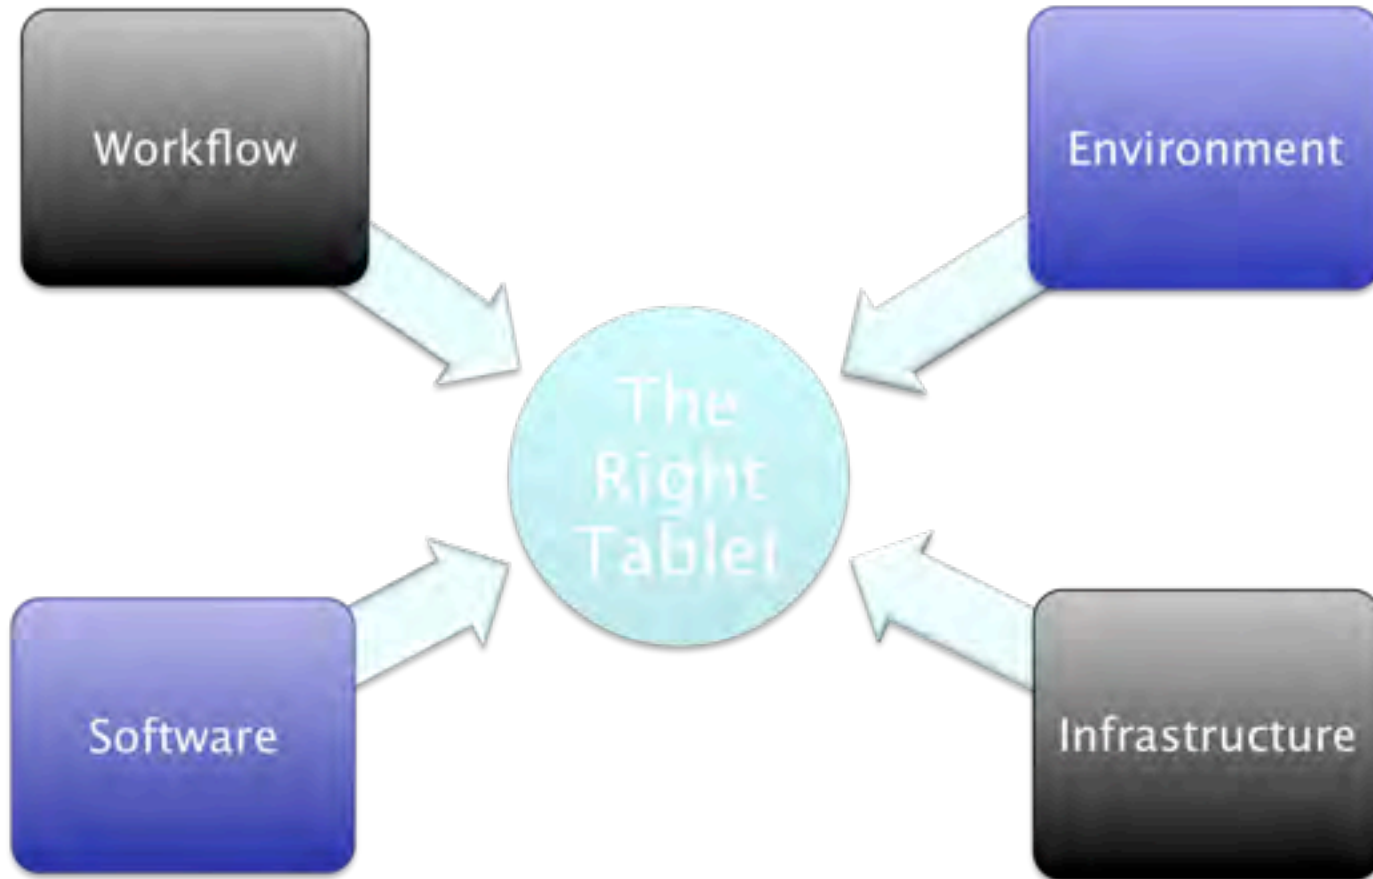

# What is a Tablet PC?

- Tablet PCs are productivity tools designed for the standing or walking worker who needs constant access to data.
  - Provide optimal computing power, battery life and ergonomic design
  - Improve productivity, increase revenue per transaction, accelerate turnaround times and reduce error
  
- Why have they become so popular?
  - Users expect anytime access to data – patient bedside, couch, car
  - Touch-friendly OSs, applications are becoming more common
  - Users are more comfortable with touch-displays (phones, kiosks)
  - Tech advances are enabling combined power, light weight and battery life

Businesses are interested in the productivity gains made possible by tablets, but are unsure of what products to choose.

# Productivity Considerations

# Productivity Considerations (cont.)

- **Workflow**
  - How is work being done now?
  - How is work going to change?
  - How many devices must users manage?
- **Software**
  - Do you need to run existing applications?
  - Can the application run virtually?
  - Do you need to run more than one application at a time?
- **Infrastructure**
  - Will wireless always be available?
  - Will units need to be managed remotely?
  - Are their business-level service centers available?
- **Environment**
  - Will the tablet be exposed to moisture or dirt?
  - Will they be used outdoors?
  - Will they be used 24/7?

“If you automate a process that is out of control, you just get out of control faster.”

# Key Requirements for Business

- **Business Integration & Security**
  - Remote manageability
  - Integrated security
  - Asset tracking and recovery
- **Data capture**
  - Pen and touch input for simplified navigation and signature capture
  - Integrated tools to streamline content acquisition
- **Mobility**
  - Portable enough to be carried all day
  - Peripherals to aid in customization for individual needs
  - Wireless connectivity available for ongoing connectivity
- **Environment**
  - Rugged enough to withstand highly mobile environments
  - Light enough to be carried all day
  - Standard business application support

# Questions?
